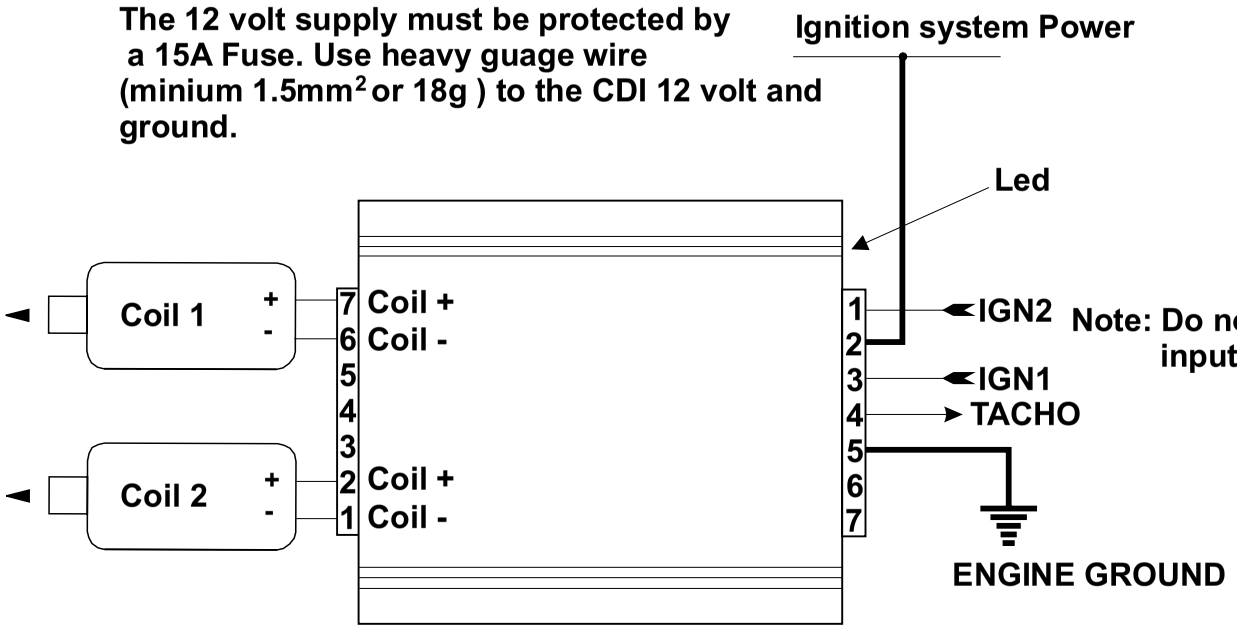
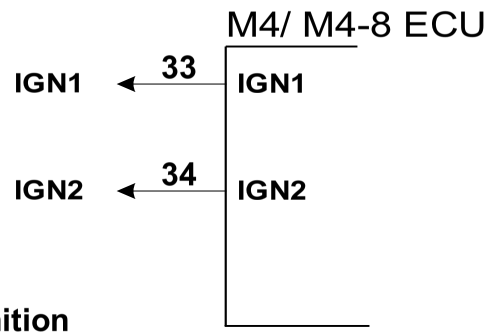
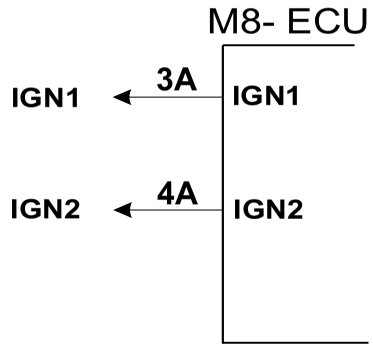
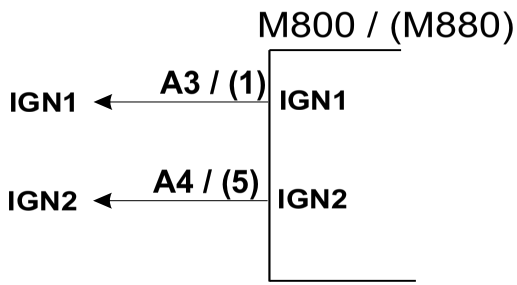
Note:
The 12 volt supply must be protected by a 15A Fuse. Use heavy guage wire (minium 1.5mm^2 or 18g) to the CDI 12 volt and ground.



Note: Do not trigger both ignition inputs at the same time.







Notes: Twist wires to coils.
Max CDI to coil wire length = 1m.
Use 1.5mm^2 or 18g wire to coil.
Do not connect any other vehicle wires to coil.
The CDI should be protected from water splash and high temperatures.

Setup	ign	1
	COIL	2
	dELL	0

SPECIFICATIONS

Supply Voltage 12-14V DC negative ground
Coil Primary voltage = 450V
Max Ignition frequency = 650Hz
Tacho = 12V, 20mA square wave

CAUTION!
HIGH VOLTAGE
