MoTeC Pty Ltd - Automotive Performance Enhancing Electronic Systems

CAPABILITIES

- Founded in 1987, Australian Owned, operates globally.
- Established premium supplier to almost all motorsport categories globally, & defence since 2006.
- 60+ employees, and over 190 dealers in over 50 countries.
- Headquarters & R&D Centre based in Melbourne Australia.
- All MoTeC products are designed in-house, ensuring effective & responsive support and product adaptation & integration.
- Products & Services covering areas which include:
  - Data acquisition & management systems enabling equipment health & usage monitoring, driver/crew training, & more cost effective ILS.
  - Accident recording & monitoring, & roll-over warning.
  - Intelligent Digital Displays enabling platform capability & future-proofing.
  - Power distribution & management systems providing intelligent & reliable platform power management & redundancy.
  - Data acquisition & video capture enhancing driver/crew training.
  - Engine management & control systems.

DISCRIMINATORS

- MoTeC a history of over 25 years in developing very high capability automotive performance enhancing products in compact & lightweight footprints.
- Product capabilities are customisable at the software level, ensuring ease & timeliness of adaptability to applications & implementation, & ensuring future proofing of system & investment.
- Established reputation for innovative, tough, & reliable products, proven & tested in the demanding professional motor racing environment.
- Commitment to continuous technology development & innovation, with over 30% of the organisation committed full time to R&D.
- Application engineers/tech. support team with extensive experience in optimising vehicle /platform & driver performance
- Cost effective & easy product integration of all MoTeC products, & with all vehicle/platform CAN BUS & direct sensor devices.

KEY CUSTOMERS

- **Defence Materiel Organisation (DMO)** – land platform data acquisition systems (VDMS) & analysis, HUMS/Vtronics system implementation & application trial, customisation & support.
- **Mercedes Benz & Magna Steyr** – supply of VDMS/HUMS electronics systems & associated support services.
- **BAE Systems Australia** - supply of VDMS/HUMS electronics systems & associated support services.
- **Thales Australia** - supply of VDMS/HUMS electronics systems & associated support services.
- **GDLS Australia** - supply of VDMS/HUMS electronics systems & associated support services.
- **Force Protection US** – supply of vehicle display & power distribution & management systems & associated support services.
- **Various OEM Car Manufacturers** – supply & support of in-vehicle performance data display capability & vehicle testing systems.
- **Various Implementers of Alternate Fuels Systems** – supply of engine management systems & associated technical & implementation support.
- **V8 Supercars Race Category** - supply of automotive performance enhancing & category management systems & associated support services.

QUALITY APPROVALS

Production facility:

- ISO 9001: 2008: AU10/79616.00
- ISO 13485:2003: AU07/71132.00
- ISO14001
